Sonim · Marketing design system

White paper design system.

Tokens, type, grid, graphic elements, components and page templates for Sonim white papers.

Version 1.0 · September 2026. Built from the Sonim Visual Identity Standards & Brand Guidelines (March 2020) and the Sonim Social Media General Use Templates (2023). Where this document and the brand guidelines differ, the brand guidelines win.

sonim
A NEXA Company

Foundations

A Sonim white paper is industry thought leadership, not a product sheet. The design should read as direct, focused and capable, the way the brand describes itself.

Personality

Confident	Act with assuredness and poise.
Genuine	Authentic and honest, free of pretense.
Informative	Clear and to the point, no flourish.
Passionate	Believe in the mission.

Tone

Positive	Affirmation and support.
Optimistic	Tomorrow will be better.
Grounded	Sensible and well balanced.
Smart	Simple and to the point.

Five rules for every white paper

01 Four colors, used boldly. Sonim Red, Black, Gray and White. Red is for emphasis, the notch and one hero panel per spread, not for body text.

02 Sentence case, flush left. Never ALL CAPS or Title Case, including labels and table headers. Headlines end with a period when they are statements.

03 Headlines in black, key phrase in red. On red panels the emphasis flips to black.

04 The notch anchors every page headline. One notch per page at the left edge, the same size on every page.

05 Proof over claims. Every statistic carries a red superscript source number that resolves on the back cover.

Color

A small palette for maximum impact. Avoid combinations that are too dark and heavy: white and gray pages carry the document, red marks what matters.

Suggested share per page: White 65–75% · Gray 10–20% · Red 5–15% · Black for type and rules.

Approved foreground / background pairs

Aa	Aa	Aa	Aa	Aa	Aa
Black on gray	Red on gray	Black on white	Red on white	White on red	Black on red
Aa	Aa	Aa	Aa	Aa	Aa
White on black	Red on black	Gray on red	White on gray (display sizes only)	Gray on white (graphic only)	Gray on black

Utility values (not brand colors): hairline rules rgba(0,0,0,.18); secondary small print rgba(0,0,0,.68). Use only for rules, captions, sources and metadata.

Typography

Akzidenz Grotesk Bold and Regular for all print work (Berthold). Condensed cuts for spec tables only.

Akzidenz-Grotesk Pro (Regular and Bold) is used for every text role, embedded in the HTML and PDF builds.

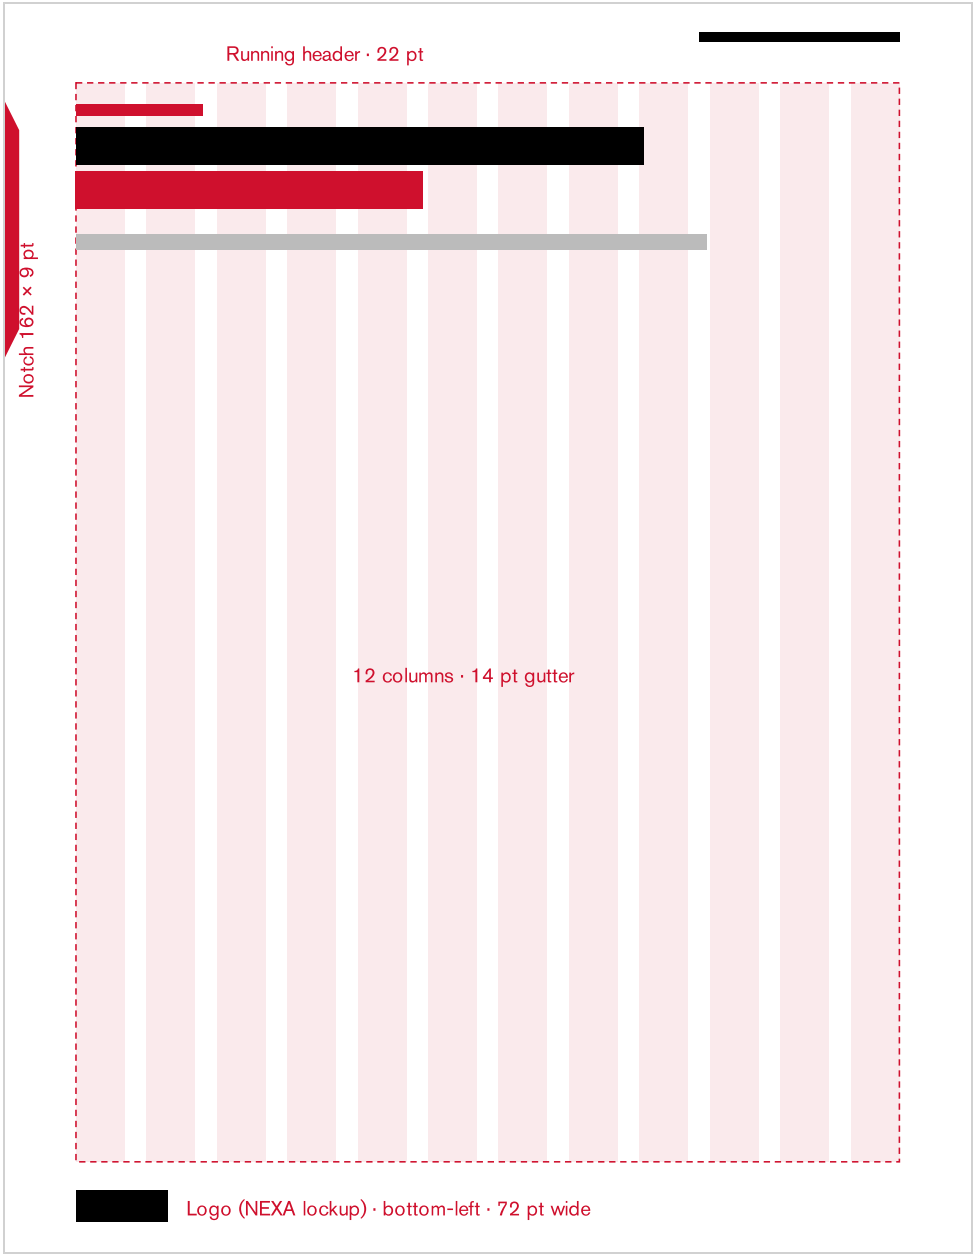

Headlines: tight kerning and leading. Sentence case. Flush left.

Style · token	Specimen	Size / leading	Weight · track	Use
Display .display	**Connected care.**	46 / 43 pt (shown at 38)	Bold · −30	Opening-page title. One per document.
H1 .h1	**Page headline in red.**	27 / 27 pt	Bold · −25	One per page, with the notch.
H2 .h2	**Section heading**	15 / 17 pt	Bold · −15	Sections, callout and case-study titles.
H3 .h3	**Sub-heading**	12 / 15 pt	Bold · 0	Challenge / Solution labels (red in case studies).
Label .label	Customer spotlight	9 / 11.5 pt	Regular · +30 · Red	Eyebrow above H1 / H2.
Lead .lead	Lead paragraph that frames the page.	12.5 / 16.5 pt	Regular	First paragraph under H1. Max 3 lines.
Body p	Body copy for running text, 60–75 characters per line in a 7-column measure.	9.25 / 13.5 pt	Regular · run-ins in red	All running text.
Stat .stat .n	**18,200+**	34 / 32 pt	Bold · −30 · Red	Max 3 per row, always sourced.
Quote .quote	**“Customer voice in bold.”**	15 / 18 pt	Bold · −10	White on red band.
Small .small	Captions, metadata, chips, sources.	9 / 12 pt	Regular	Minimum size 9 pt (12 px). Never bold below 12 pt.

Page & grid

US Letter portrait, 8.5 × 11 in (612 × 792 pt). 12 columns with a 14 pt gutter. Photography bleeds; type never does.

Side margins	45 pt (0.625 in)
Top margin	50 pt; running header at 22 pt
Bottom margin	58 pt; logo at 22 pt
Live width	522 pt
Column	30.67 pt × 12
Body measure	7 columns (≈ 295 pt)
Sidebar	5 columns
Spacing unit	4.5 pt (X/2): 9, 13.5, 18, 27, 36, 54
Bleed	0.125 in on all sides for print

Standard page zones

01 Header zone. Label (8 pt red) + H1, with the notch aligned to the label's top.

02 Lead zone. One lead paragraph across 10–12 columns.

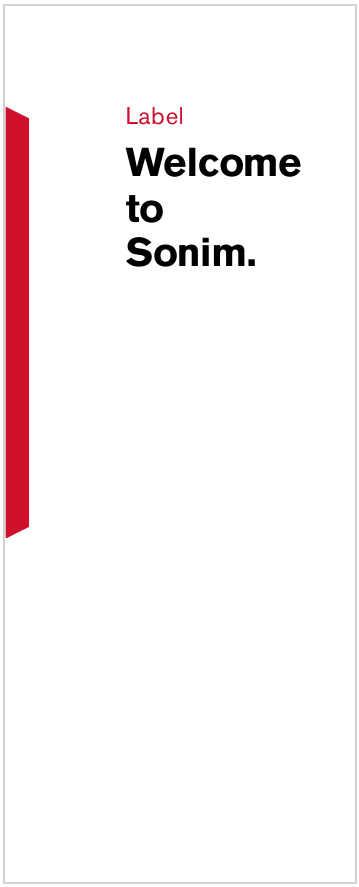

03 Content zone. 7 + 5 columns (text + sidebar), 6 + 6 (case studies) or 12 (tables, stacks).

04 Footer zone. Logo bottom-left only. No page numbers in the footer; the folio sits in the running header.

Graphic elements

All three elements come from one shape: the notch, built at an 18:1 ratio with 26.5° angled ends. X = notch width = 9 pt (0.125 in); notch height = 18X = 162 pt (2.25 in).

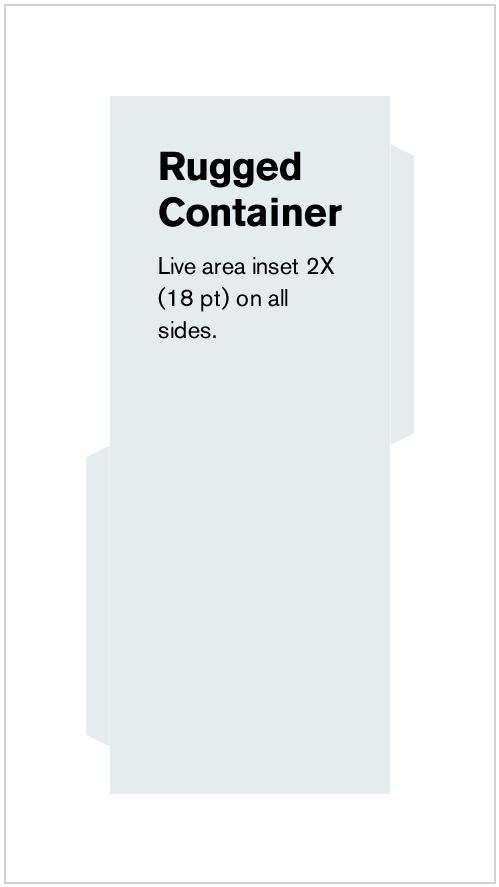

Keep the notch the same size on every page. Scale only in 25% steps.

The Notch

Anchors the page headline on the left edge. .notch-anchor on the headline block. One per page, always Sonim Red.

162 × 9 pt · top aligned to label · bleeds off left edge

The Rugged Container

Holds copy, checklists and data. Right notch 2X from the top, left notch 2X from the bottom; neither passes the center line. Always taller than wide, never taller than 175% of its width. .rc, .rc.red, .rc.black

The Expanded Notch

Divides horizontal space: extends to three edges and covers 25, 50 or 75% of the width. Use for covers, back covers and photo pages. Red or Gray. .xnotch.w50

Components

Build every page from these blocks. Class names refer to sonim-whitepaper.css.

.checks	Checklist, red tick
.bars	Results list, red bar
.compare	Before / after table
.stat	Big number + source
.quote	Red quote band
.icon-tile	Line icon + H3 + text
.case	Case-study column
.layer	Numbered stack row
.chips	Feature tags
.sources	Numbered citations

Callout heading:

Page templates

Five master pages cover a 4-page white paper plus back cover. Mix T2 and T3 for longer papers; keep T1 first and T5 last. Shown: “Connected care in motion” (EMS), built on these templates.

T1 Opening

Hero photos, Display title, 7 + 5 body and Rugged Container. ~220 words.

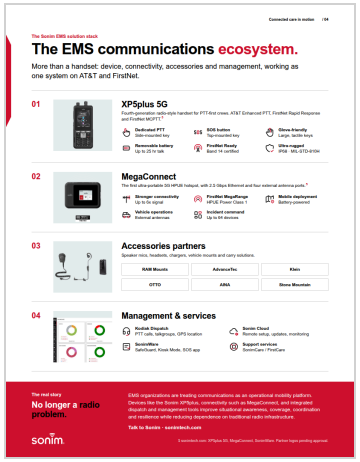

T2 Argument

H1, lead, 2-column body, comparison, stats, icon row. ~250 words.

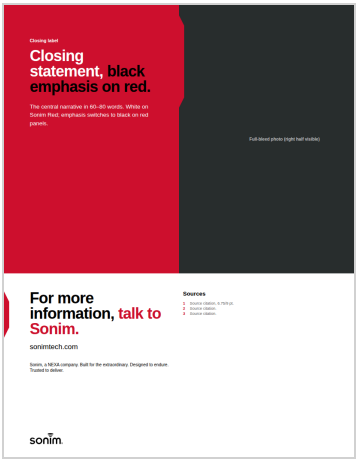

T3 Proof

Two case-study columns and a quote band. ~300 words.

T4 Solution

Stack layers with product renders, icon callouts and a closing band. ~220 words.

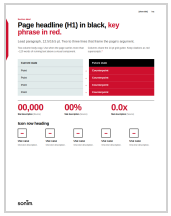

T5 Back cover (optional)

Expanded Notch (50%) over photo, CTA, sources. Use when the paper runs past 4 pages.

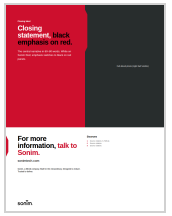

Blank masters (whitepaper-template.html)

Imagery & icons

Authentic situations. Natural light. Real people with quirks. Evidence of work. Sense of place. Rugged toughness. Clear and direct compositions.

Product renders sit on Sonim Gray or white with natural shadows. Icons are black line drawings on a 24 × 24 grid with one red detail.

Do

- Use one Display title and one H1 per page.
- Keep the notch the same size on every page.
- Put the key phrase of each headline in red.
- Bleed photography off the page edge; keep type inside margins.
- Source every number; list sources on the back cover.
- Show partner logos in single-color black, only when approved.

Don’t

- Set anything in ALL CAPS or Title Case.
- Add colors, gradients, drop shadows or tints outside the palette.
- Use more than one red hero panel per page.
- Stretch, recolor or add effects to the logo; min width 0.5 in.
- Use staged, over-lit or heavily filtered stock photos.
- Make a Rugged Container wider than it is tall.

Making a new white paper

Files: sonim-whitepaper.css (tokens and components), whitepaper-template.html (T1–T5 masters with placeholders), sonim-logo.svg, and an images folder.

01 Brief to outline. Map the brief to T1–T5. Four content pages is the default; add T2 or T3 pages in pairs.

02 Write to the word budgets on page 08. Headlines in sentence case with one red key phrase.

03 Collect proof. Every stat gets a source number; customer quotes need approval.

04 Pick photography per the imagery rules: one people photo on T1, customer photos on T3, product renders on T4, one full-bleed photo on T5.

05 Build. Duplicate whitepaper-template.html, replace placeholders, point image slots at your files. The logo is injected at build time.

06 Render and check. Export to PDF at US Letter with backgrounds on. Check overflow on each page, notch alignment, and that nothing is set in caps.

07 Hand off. For InDesign production, rebuild using the same tokens: paragraph styles named Display, H1, H2, H3, Label, Lead, Body, Small, Stat, Quote; swatches Sonim Red, Black, Gray; Akzidenz-Grotesk Pro throughout.
